Secure 3rd rank in Web Development Cohort

Organized by Skillvalley

08/2022 - 09/2022

- Lead a team of 3.
- Developed 3 features of the project - User authentication, contact list management, and UI of bulk email sender. [\[View Code\]](#) [↗](#)

PROFESSIONAL PROJECTS

Workforce & Field Operations Platform with Custom CRM Builder- React, Redux-Saga, Tailwind CSS, TypeScript

- Developed the complete frontend workflow for the **leave management system**, covering both admin and employee user flows, and integrated it seamlessly into the existing platform.
- Implemented CRUD functionality for modules, including **notes**, **meetings**, and **asset management**.
- Actively participated in debugging and resolving complex UI and state-management issues of the other features of the application.

Healthcare Staffing & Homecare Management Platform – Next.js (App Router), Tailwind CSS

- Developed the **appointment scheduling** module with support for both recurring and single-day meetings, following an **Outlook-style interaction pattern**.
- Worked on the **admin panel** interface, building and optimizing **role-based screens** and workflows for managing caregivers, clients, and schedules.

E-commerce app for work gears, safety equipment - Next JS, Tailwind CSS, SCSS, Typescript

- Converted **Figma mockups** into a **fully functional, responsive, SEO-friendly** website.
- Created **cart flow**, **check-out**, and **localization** functionality from Scratch.
- Led the implementation of multiple functionalities like **multi-brand theming** within a **single codebase** along with **users and Teams Management dashboard**.
- Made the app accessible both **independently** and **within an iframe**.

Property Listing Web App: Next JS, Tailwind CSS, Storybook, Typescript, Node JS.

- Configured the Next.js codebase along with **ESLint** and **Storybook** to optimize development processes and ensure code consistency.
- As a Front-End Lead, I oversee **documentation creation**, **conduct code reviews**, and **strategize** front-end development approaches.
- I also implemented **Auth**, **Filter**, and **Pagination** functionalities along with a multi-select **Search** functionality.
